

ARMY BUILD CHEAT SHEET

- 1: Tanky lord with mage. Only take 1 - 2 abilities / items. Take 1 expensive spell, 1 cheap spell.
- 2: Take a frontline of cheap / midtier troops. Bring some spears for backline defense.
- 3: Bring 2 - 4 calvary units. Skirmish calvary can be good but requires a lot of micro.
- 4: Think about taking 2-3 ranged units. Remember to keep their defensive cover nearby.
- 5: Finish the build with a couple of artillery pieces or your favorite monster.
